No to nuclear power

Some sources:

Perhaps the most comprehensive source of information about nuclear power written from a critical angle is the website '**No2nuclear Power**', run by Pete Roche, a former Greenpeace campaigner. See <http://www.no2nuclearpower.org.uk/>

The website links to a provides an extremely useful daily news service on not only nuclear issues but also renewable energy and energy efficiency issues. The link for the mailing list is <http://www.no2nuclearpower.org.uk/mailling-lists/>

A lot of work is put into maintaining this service, so you are encouraged to donate to support it.

Nuclear Consulting Group (NCG)

Website <https://www.nuclearconsult.com/>

This is a network of experts who are interested in nuclear power policy issues. The NCG is generally seen as sceptical of the idea of supporting nuclear power and its prospects. The website itself serves as a good source of news stories about nuclear power and also green energy strategies.

Nuclear Free Local Authorities (NFLA)

The NFLA publishes, and gives links to, many studies covering environmental, financial and political concerns relating to nuclear power. See <https://www.nuclearpolicy.info/>

Local Campaigns

Among the currently active anti-nuclear campaigns are:

Together Against Sizewell C <https://tasizewellc.org.uk/>

Blackwater Against Nuclear Power <https://www.banng.info/>

Cumbrians Opposed to a Radioactive Environment (CORE) <http://corecumbria.co.uk/>

Expertise on nuclear radiation issues<https://www.ianfairlie.org/>

We're not afraid to see comparisons with pro-nuclear sources:

Nuclear Safety Regulation

The Office for Nuclear Regulation is responsible for regulating safety in the nuclear power industry <http://www.onr.org.uk/>

Nuclear Industry links

Nuclear Industry Association <https://www.niauk.org/>

World Nuclear Association <https://www.world-nuclear.org/>
